EDUCATION

University of Maryland

Master of Information Systems (Plus One Program)

Courses: Advanced Data Science, Cloud Computing, Machine Learning

College Park, MD

Expected May 2027

University of Maryland

Bachelor of Information Science

Courses: Computer Architecture, Database Design, UX Design

College Park, MD

Expected May 2026

SKILLS

Languages: Python, JavaScript/TypeScript, Java, SQL, C++, Bash

Frameworks & Cloud: React.js, Next.js, Node.js, Flask, REST APIs, Docker, AWS, GitHub Actions, CI/CD

Data & Tools: OpenAI API, Prompt Engineering, CI/CD, Linux, Git, Vercel, Supabase, React.js

WORK EXPERIENCE

Technical Consultant

The University of Maryland

College Park, MD

Sept. 2025 – Dec. 2025

- Led HubSpot CRM implementation for career consulting client; migrated **2,200+** contact records, built Python automation scripts for data transformation.
- Delivered user guides and process documentation; enabled scalable outreach tracking and relationship management.

Software Engineering Intern

The Wills Group

La Plata, MD

Jun. 2025 – Aug. 2025

- Architected ML pipeline ingesting **1TB+** enterprise data; cut L1 manual analysis **40%** (Python, SQLAlchemy).
- Shipped dashboard for **20+** stakeholders with RBAC and zero-touch CI/CD (React, Node.js).
- Automated TLS provisioning across **10+** POS terminals; reduced config drift **80%**, maintained PCI-DSS compliance.

Site Reliability Intern

The Wills Group

La Plata, MD

Jun. 2024 – Aug. 2024

- Streamlined Meraki MX67/MS120 deployments across **8** retail sites; cut staging time **40%**.
- Built IoT provisioning automation for **45+** BOHA devices; delivered **50%** ahead of schedule across **40+** locations.
- Authored network runbooks and SOPs; reduced onboarding time **25%**, decreasing escalation rate.

Information Technology Intern

The Wills Group

La Plata, MD

Jun. 2023 – Aug. 2023

- Automated Windows provisioning via MDT and golden images; cut setup time **50%** across **3** sites.
- Triaged **40+** tickets across 250-employee base using Jira; reduced downtime **35%**, decreased L2/L3 escalations.

Data Science Intern

ReMax One

La Plata, MD

Jun. 2022 – Sept. 2022

- Designed normalized MySQL schema replacing Excel workflows for **175+ clients/properties**; built ETL pipelines with **95%** integrity validation (Python, Pandas, SQLAlchemy).

PROJECTS

PoliView — *React.js, Next.js, TypeScript | Supabase | Vercel | Congress.gov API, Axios, Framer*

May 2025

- Aggregates **500+** daily bill updates via Congress.gov API; enables users to track voting records and policy shifts.

Flame — *React.js, Next.js, TypeScript | Firebase | Vercel | OpenAI (DALL-E), Axios, Tailwind CSS*

Oct. 2024

- AI thumbnail-generator using a GPT-4o + DALL-E pipeline with request queuing; handles **35+** concurrent users without throttling.

QuranQuest — *HTML, CSS, JavaScript | Flask (Python)*

Dec. 2023

- Gamified Islamic education platform with interactive quizzes and progress tracking; deployed across **2 mosques** serving **80+ students** with personalized learning modules.

EnchantmentPLUS — *Java | Forge API, Spigot API | Blockbench, GIMP*

Aug. 2023

- Minecraft mod with custom enchantment engine and particle system optimization; reverse-engineered game mechanics to implement balanced progression system supporting **100+ concurrent players**.
