EDUCATION

University of Maryland, Robert H. Smith School of Business

Master of Science in Information Systems

College Park, MD

May 2027

Relevant Courses: Database Management, Data Analysis in Python

University of Maryland

Bachelor of Science in Information Science | Magna Cum Laude

College Park, MD

May 2026

Relevant Courses: Technologies, Infrastructure & Architecture, Cloud Computing, Data Science

SKILLS

Languages: Python, SQL, Bash, R

Infrastructure & Cloud: AWS (S3, EC2, Lambda), Docker, Linux, GitHub Actions, CI/CD, Networking

Security & Data: Entra ID, Intune, Conditional Access, PCI-DSS, Tableau, Spark, dbt, PostgreSQL

Certifications: AWS Certified Cloud Practitioner, AWS Certified AI Practitioner

WORK EXPERIENCE

Technical Consultant

The Super Crowd, Inc.

Remote

Jan. 2026 – Present

- Led end-to-end data ingestion for AI diligence platform covering **587+** Reg CF offerings.
- Designed **12**-table MariaDB schema with **23** integrity checks and versioned migrations.
- Secured client database access over TLS with read-only health checks, owning team credential handling.

Infrastructure Specialist

The Wills Group

La Plata, MD

Jun. 2026 – Aug. 2026

- Designed and rolled out MFA for **300+** users, phasing non-compliant devices first using Intune and Entra data.
- Conducted PCI-DSS Tier 1 gap analysis across **50+** sites, documenting gaps and authoring policies before QSA review.
- Planned and configured team migration from Meraki to UniFi, cutting rack footprint **20%**.

Technical Consultant

The University of Maryland

College Park, MD

Sept. 2025 – Dec. 2025

- Built Python ETL and HubSpot API automation migrating **2,200+** contacts within free-tier limits.

Information Technology Intern

The Wills Group

La Plata, MD

Jun. 2023 – Aug. 2025

- **Three summer internships across IT, SRE, and Solutions Engineering.**
- Automated TLS provisioning across **10+** POS terminals; reduced config drift **80%**, maintained PCI-DSS compliance.
- Wrote Python scripts to reconcile Intune records, removing **500+** stale devices and **100+** inactive users.

Data Science Intern

ReMax One

La Plata, MD

Jun. 2022 – Sept. 2022

- Built Python ETL migrating **175+** client/property records from Excel to normalized MySQL; **95%** validation pass.

PROJECTS

TerraCraft — *Python | PyYAML | RCON (TCP) | IaC*

Jul. 2026

- Engineered a Terraform-style IaC engine in Python: declarative YAML resource model, plan/apply/destroy lifecycle with read-only planning, SHA-256 fingerprint diffing, isolated per-stack state, and idempotent, deterministic provisioning against live Minecraft servers.

ClaimSight — *Python | XGBoost, TensorFlow, SHAP | Docker, Streamlit, Hugging Face*

May 2026

- Built a multimodal fraud detection pipeline pairing an XGBoost claims classifier (**0.923** ROC-AUC) with a TensorFlow damage-severity model; flags claim-photo inconsistencies with SHAP explanations for SIU review, containerized with Docker.

Beyond the Score — *Tableau | Riot Games API | Data Visualization*

May 2026

- Built a four-part interactive Tableau story analyzing **2,346** player-match records across **10** rank tiers; found ping volume rises **15x** from lowest to highest rank and high-vision players lead kill participation at every tier.
