EDUCATION

University of Maryland, Robert H. Smith School of Business

Master of Information Systems

College Park, MD

May 2027

Courses: Machine Learning, System Design, Cloud Computing

University of Maryland

Bachelor of Information Science | Magna Cum Laude

College Park, MD

May 2026

Courses: Computer Architecture, Database Design, Networking

SKILLS

Languages: Python, JavaScript/TypeScript, Java, SQL, C++, Bash

Frameworks & Cloud: React.js, Next.js, Node.js, Docker, AWS, Azure, GitHub Actions, CI/CD

Infrastructure & Tools: Linux, Git, MySQL, SQLAlchemy, Networking, VLANs, Microsoft Intune

WORK EXPERIENCE

Infrastructure Specialist

The Wills Group

La Plata, MD

Jun. 2026 – Present

- Supporting PCI-DSS Tier 1 merchant compliance initiative; implementing VLAN segmentation and firewall hardening across **50+** retail sites.
- Assisting MFA rollout across **300+** employees; managing lifecycle plan for **500+** end-user devices.
- Deploying UniFi network stack replacing Meraki and Heartland/Fiserv; reducing physical rack footprint by **20%** via virtualization.

Technical Consultant

The Super Crowd, Inc.

Remote

Jan. 2026 – May 2026

- Built AI-assisted SEC EDGAR diligence system with LLM claim verification pipeline; cut analyst review time **90%**.
- Architected **9**-entity MySQL schema with DFD and ERD; selected optimal stack across **3** architectures.

Technical Consultant

The University of Maryland

College Park, MD

Sept. 2025 – Dec. 2025

- Built Python ETL pipeline migrating **2,200+** contacts into HubSpot CRM with **95%+** integrity; resolved contact limit.

Site Reliability Intern

The Wills Group

La Plata, MD

Jun. 2023 – Aug. 2025

- Three summer internships across IT, SRE, and Solutions Engineering.**
- Automated TLS provisioning across **10+** POS terminals; reduced config drift **80%**, maintained PCI-DSS compliance.
- Built IoT provisioning automation for **45+** BOHA devices; delivered **50%** ahead of schedule across **40+** locations.

Data Science Intern

ReMax One

La Plata, MD

Jun. 2022 – Sept. 2022

- Designed normalized MySQL schema replacing Excel workflows for **175+ clients/properties**; built ETL pipelines with **95%** integrity validation (Python, Pandas, SQLAlchemy).

PROJECTS

mahad.studio — *Next.js 15, React 19, TypeScript | AWS S3, CloudFront | Vercel | Framer Motion*

Jun. 2026

- Full-stack portfolio with interactive terminal architecture page and chapter-based tech journey; images served via CloudFront CDN with S3 origin access control.

PoliView — *React.js, Next.js, TypeScript | Supabase | Vercel | Congress.gov API, Axios, Framer*

May 2025

- Aggregates **500+** daily bill updates via Congress.gov API; tracks voting records and policy shifts.

Flame — *React.js, Next.js, TypeScript | Firebase | Vercel | OpenAI (DALL-E), Axios, Tailwind CSS*

Oct. 2024

- GPT-4o + DALL-E thumbnail pipeline with request queuing; handles **35+** concurrent users without throttling.

QuranQuest — *HTML, CSS, JavaScript | Flask (Python)*

Dec. 2023

- Gamified Islamic education platform serving **80+** students across **2** mosques with personalized learning modules.

EnchantmentPLUS — *Java | Forge API, Spigot API | Blockbench, GIMP*

Aug. 2023

- Minecraft mod with custom enchantment engine supporting **100+** concurrent players.
